SUMMARY

Software Engineer with 1+ year of experience modernizing enterprise rules platforms — migrating legacy Perl applications to Java and developing a Java-based DSL (Domain-Specific Language) engine for business rules. Proficient in Core Java, the Collection Framework, Stream API, and the Spring/Spring Boot ecosystem, with hands-on experience in schema design, system integration, observability with Grafana, and writing clean, well-tested code (95%+ coverage).

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL, Perl, HTML/CSS

Frameworks & Technologies: Spring, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Servlets, JDBC, React

Tools & Platforms: Git, GitHub, Bitbucket, Jira, Postman, Grafana, OpenSearch, IntelliJ IDEA, Windsurf, MySQL

Concepts: Object-Oriented Programming, Stream API, REST API Design, DSL Design, Schema Design, Unit Testing, Agile/Scrum

EXPERIENCE

Neurealm (formerly GS Lab | GAVS)

Mar 2025 – Present

Software Engineer | Project: Athenahealth – Rules Engine Modernization

Chennai, TN

- Modernized a legacy Perl rules application by migrating 15,000+ business rules to Java using the Collection Framework (**List**, **Map**, **Set**) and Stream API, improving performance and maintainability.
- Developed core components of a Java-based DSL (Domain-Specific Language) engine supporting 20+ operators (comparison, logical, string, collection, assignment) with multi-level, registry-driven syntax and semantic validation.
- Designed multi-scope (global/local/network) database schemas and developed REST APIs for DSL rule authoring, task lifecycle management, version history, and dark-launch deployment with rollback, as part of the integration team.
- Built a claim-level metrics logging system to track DSL success/failure counts and execution timings, integrated with Grafana dashboards for real-time monitoring and alerting.
- Achieved 95%+ unit test coverage and managed Bitbucket (Git) pull requests and code reviews for conflict-free team integration.

PROJECTS

Developer Portfolio Website | *React, Tailwind CSS, Spring Boot, REST APIs* [Live]

Dec 2025

- Built a full-stack developer portfolio with a React frontend and a Spring Boot REST backend.
- Implemented a contact form with email notifications, live GitHub stats, and an admin dashboard, plus dark/light theme, responsive design, and PWA offline support.

Elliptic-Curve Diffie-Hellman Secure Communication | *Java, MySQL, JDBC*

May 2024

- Developed a secure communication system for encrypted patient-doctor data transfer using Elliptic-Curve Diffie-Hellman (ECDH) key exchange with AES encryption.
- Built backend logic in Java with JDBC and MySQL, hosted on an Apache server, supporting secure messaging, electronic health records, and medical image transfer.
- Published the research in the *International Journal of Novel Research and Development (IJNRD)*, May 2024. [Link]

EDUCATION

Anna University (BIT Campus)

Jun 2024

B.E. Electronics and Communication Engineering

CGPA: 8.26/10.0

CERTIFICATIONS & TRAINING

- Programming in Java – NPTEL (Scored 84%)
- Learn Web Development with HTML, CSS, JavaScript – Coursera
- Junior Grade Typewriting (English) – First Class with Distinction
